Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-13,15,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. This patent discloses the determination of wear in mechanical machines via sensing the electrical draw of a subsystem and subsequent determination of the wear in a second subsystem.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14,16,17,19-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. the limitations of these claims would have been obvious design choices only once the basic process was known. For example, the patent states that the process can be used in pulverizers. Coal grinders are well known pulverizers so that in claims 28+, the use of the wear determination system would have been well within the scope of one skilled in the art. Also, the particular frequency machine used

within the process would have been obvious once the use of the process in a mechanical machine was known as in the patent.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
